PROFESSIONAL SUMMARY

Software Engineering graduate (June 2026) with a cybersecurity concentration and active certifications including eJPT and ISC² CC. Hands-on experience in vulnerability research, security operations, and cloud security through bug hunting, internships, and practical academic projects. Completed real-world AWS security labs involving S3 bucket hardening, IAM least-privilege policy design, KMS encryption, and secure secrets management with AWS Secrets Manager — demonstrating cloud security principles directly transferable to identity and access management. Foundational knowledge of Active Directory, Microsoft 365, and Entra ID concepts gained through cybersecurity coursework and certification preparation. Practical SOC internship experience performing initial log analysis, ticket handling, and incident triage. Strong documentation habits with published technical writing blog on medium. Comfortable diagnosing problems methodically, communicating clearly with end users, and escalating issues appropriately. Flexible and prepared to work North American shift hours in a service desk and security monitoring role, with a strong willingness to learn new technologies on the job.

PROFESSIONAL EXPERIENCE

- **GRC Intern**

Cybrox | Oct 2025 – Dec 2025 (8 weeks, Remote)

- Drafted foundational security policies aligned with governance best practices
 - Conducted mock audits and basic risk assessments using structured templates
 - Assisted in risk identification and evaluation exercises
 - Developed understanding of compliance frameworks and governance processes
 - Gained exposure to how technical security controls align with compliance requirements

- **Security Operations Center (SOC) Intern**

SOC Academy | Aug 2025 – Sep 2025 (6 weeks, Remote)

- Performed structured SOC training in monitoring and incident response
 - Analyzed logs and security alerts using SIEM concepts
 - Practiced threat detection workflows and incident triage procedures
 - Gained understanding of attacker techniques and defensive monitoring strategies

EDUCATION

Bachelor of Science in Software Engineering (Final Semester)

Bahria University, Karachi | 2022 – Present

Current Semester: 8th

CGPA: 3.34

Intermediate in Pre-Engineering

Bahria College, Karachi | 2019 – 2021

TECHNICAL SKILLS

- **Cloud Security**
AWS S3 security hardening, IAM policy basics (least privilege, user groups), AWS KMS concepts, AWS Secrets Manager basics, CloudTrail fundamentals, EC2 environment isolation
- **Identity & Access Management**
Basic AD and Entra ID concepts (coursework), RBAC concepts, MFA concepts, credential exposure awareness
- **Offensive Security**
OWASP Top 10, IDOR discovery and disclosure, broken access control, authentication flaws, reconnaissance, enumeration, privilege escalation basics, MITRE ATT&CK familiarity
- **Security Operations**
SIEM basics (Wazuh), log analysis fundamentals, alert triage, incident response basics, ticket lifecycle exposure
- **Tools**
Burp Suite, Nmap, Metasploit, Gobuster, ffuf, Dirsearch, Wireshark, Postman, AWS Console, Git, Kali Linux
- **Scripting**
Python (basic scripting), Bash basics
- **Operating Systems**
Linux, Windows 10/11

HANDS-ON LAB EXPERIENCE

TryHackMe – Top 4% Globally

- 103+ rooms completed | 17 badges earned
- Focus areas: web exploitation, privilege escalation, networking, system compromise
- Profile: <https://tryhackme.com/p/Furqan>

Cloud Security Projects (Academic)

- Identified S3 bucket misconfigurations and applied hardening (blocking public access, fixing bucket policies)

- Created basic IAM policies with least privilege principles, separating dev/production environments
- Explored AWS Secrets Manager for credential management
- Enabled CloudTrail and S3 logging for monitoring and audit trails

CERTIFICATIONS

eJPT – Junior Penetration Tester (INE) – Issued Aug 2025

ISC² Certified in Cybersecurity (CC) – Issued July 2025

ISO/IEC 27001:2022 Lead Auditor – Issued June 2025

API Penetration Testing – APIsec University – Issued Sep 2023

Jr Penetration Tester – TryHackMe – Issued Apr 2022

Pre-Security Learning Path – TryHackMe – Issued Feb 2022

Practical Ethical Hacking – The Complete Course (TCM) – Issued Jan 2022

KodeCloud Docker Training Course for Absolute Beginners – Completed Oct 2025
